

## Finding Plate Boundary Observatory GPS Location and Velocity Data from the UNAVCO Website

Name: \_\_\_\_\_

### Resources:

You can find the PBO GPS stations that you are interested in, using the interactive map available via <https://www.unavco.org/instrumentation/networks/status/pbo>

To get the data for each station, type "http://www.unavco.org/instrumentation/networks/status/pbo/overview/" then insert 4-letter station ID; for example, to access the data for PBO site P395, go to the following page:

<https://www.unavco.org/instrumentation/networks/status/pbo/overview/P395>

NAM08 reference frame -- velocities relative to the stable cratonic interior of the North American plate.

IGS08 reference frame -- velocities relative to a "no net rotation" reference frame in which all of the lithospheric plates are moving

## PBO Network Monitoring

This section of our web site provides network monitoring (instrument state of health) information for the PBO network of instruments to our engineers, principal investigators, and the public at large. PBO is a network comprised of the following sensor instrumentation: GNSS/GPS, borehole strainmeters and seismometers, and long-baseline surface laser strainmeters. See the [PBO](#) project page for more information about the PBO network.

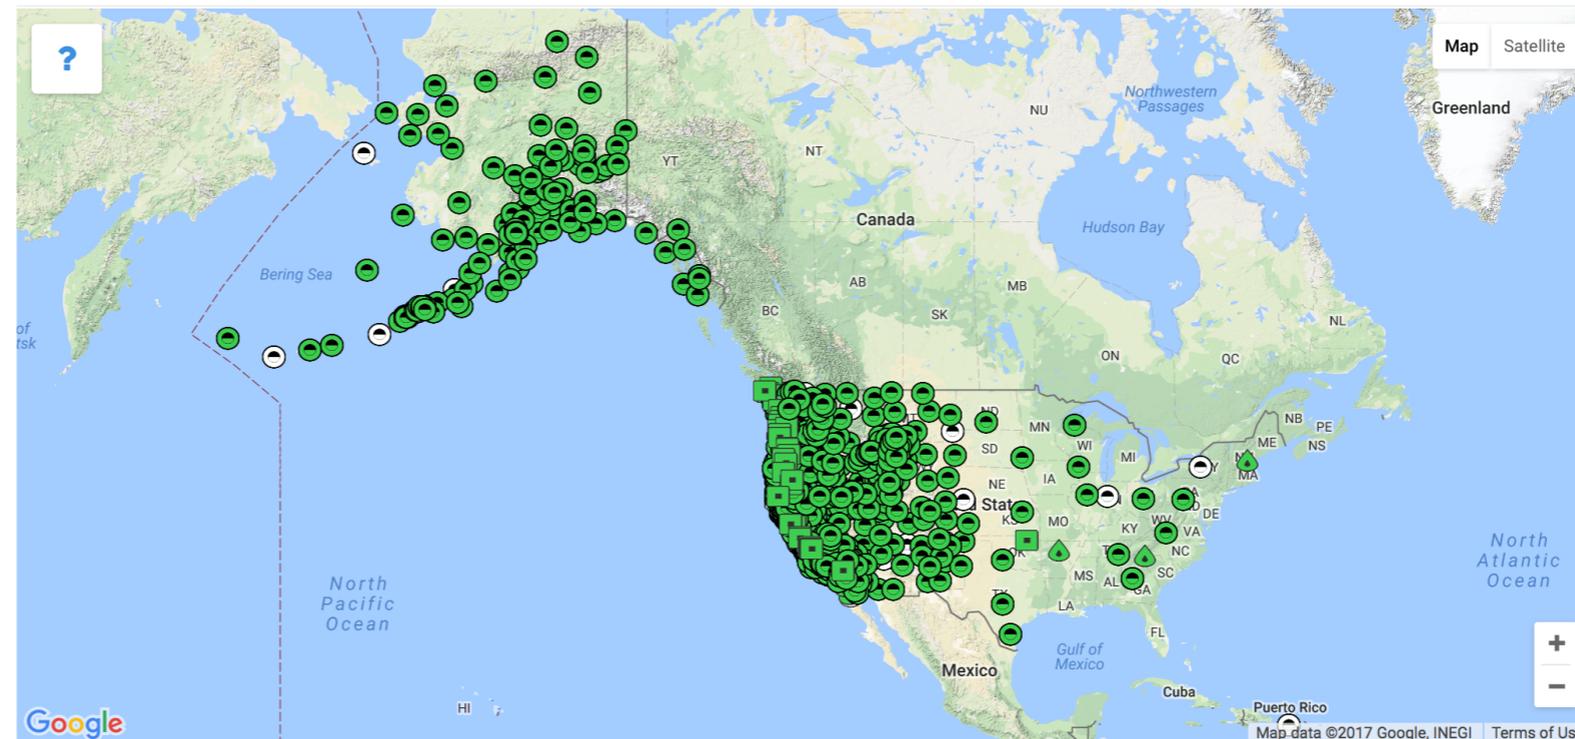

**Please note:** This area is not for data access, please see the [Data](#) section of our website to access data acquired from these instruments.

#### Station Position

### Station Type: GPS

Station Information	
4-Char ID:	P395 - GPS
Station Status:	Installed / Operable
Station Name:	Rose_LodgeOR2006
Project:	PBO
Location (City, State):	OTIS, OR
Latitude, Longitude:	45.022, -123.858
Elevation:	53 m
Monument Type:	DDBM
Station Install Date:	2006/01/24
Monument Install Date:	2006/01/24
<b>Current Status:</b>	<b>OK</b>

#### Station Position

### Station Type: GPS

**Station Information**

4-Char ID: P396 - GPS  
 Station Status: Installed / Operable  
 Station Name: RoosBC026GOR2007  
 Project: PBO  
 Location (City, State): Cloverdale, OR  
 Latitude, Longitude: 45.309, -123.823  
 Elevation: 232 m  
 Monument Type: Wellhead  
 Station Install Date: 2006/02/24  
 Monument Install Date: 2006/02/24  
**Current Status: OK**

## Finding Plate Boundary Observatory GPS Location and Velocity Data from the UNAVCO Website

Name: \_\_\_\_\_

### Resources:

You can find the PBO GPS stations that you are interested in, using the interactive map available via <https://www.unavco.org/instrumentation/networks/status/pbo>

To get the data for each station, type "http://www.unavco.org/instrumentation/networks/status/pbo/overview/" then insert 4-letter station ID; for example, to access the data for PBO site P395, go to the following page:

<https://www.unavco.org/instrumentation/networks/status/pbo/overview/P395>

NAM08 reference frame -- velocities relative to the stable cratonic interior of the North American plate.

IGS08 reference frame -- velocities relative to a "no net rotation" reference frame in which all of the lithospheric plates are moving
