A copy of this document is available to you online via the course homepage at <http://croninprojects.org/Vince/Course/PhysGeol/Initial-Acknowledgments.pdf>

By signing and submitting this document to Dr. Cronin, ***I acknowledge and accept the following statements*** related to the Geosciences 1405 course I am registered for this semester:

1. The syllabus for the lecture and lab sections of this course is accessible on the web via the course homepage at <http://croninprojects.org/Vince/Course/PhysGeol/index.htm>
2. The laboratory is a ***required*** part of this course. You are registered for a laboratory section that meets once each week.
3. The tentative schedule of all lecture topics and quizzes is posted online via the lecture syllabus: <http://croninprojects.org/Vince/Course/PhysGeol/1405SyllabusFall19.html>
4. Links to additional useful information about each topic are embedded in the tentative schedule of lecture topics and quizzes.
5. You are ***required*** to purchase access to modified MasteringGeology that is accessible through Baylor's learning-management system Canvas. Information about this is published via the course homepage and lecture syllabus.
6. The online homework and the dynamic study modules all have due dates/times, and your work on all online homework and study modules is used in determining your final course grade.
7. You are ***required*** to have access to either an etext (probably the best option) or a paper copy of the course textbook, which is the 12th edition of Tarbuck, Lutgens & Tasa, 2017, **Earth -- An introduction to Physical Geology**: Pearson, ISBN-10: 0-134-07425-4, ISBN-13: 978-0-134-07425-2, 788 p.
8. You are ***required*** to purchase your very own copy of the laboratory manual and bring it to every laboratory session. Details about the correct version of the laboratory manual is published on the laboratory web home at <http://croninprojects.org/Vince/PhysGeoLab/index.htm>
9. In order to earn credit for lab work, you are ***required*** to write your responses on the activity sheets printed in the lab manual, tear them out of the lab manual, and submit those answer sheets to your laboratory teacher at the end of each laboratory session. No credit will be given for work that is not submitted on original copies of the activity sheets.
10. There are no makeups for missed labs or online work for which you missed the deadline.

To reiterate, I acknowledge and accept the preceding statements related to Geosciences 1405.
